

Pranav Birajdar

Experienced front-end developer focused on building accessible products for the web

Work Experience

Software Developer / Isle of Code

June 2022 - Present // Remote, Canada

Isle of Code is a Toronto-based digital product studio helping companies build, ship, and maintain incredible products.

- Developed high-quality, robust production code for a diverse range of projects for clients, including Nasdaq, Addepar, and Darcy Partners
- Collaborated closely with designers, project managers, and fellow engineers to translate creative concepts into tangible production deliverables for clients and stakeholders
- Achieved a 20-fold improvement in performance and deployment time by seamlessly integrating Contentful CMS and migrating Nasdaq Data Link's marketing pages to React
- Mentored junior engineers, offering guidance and constructive feedback on their pull requests to help enhance their skills and contributions
- Took the lead in authoring detailed documentation facilitating the onboarding process for the Addepar's rebalancing project

Intermediate Front-end Developer / Walnut Insurance

June 2021 - June 2022 // Remote, Canada

Walnut Insurance is a Toronto-based startup offering simple plans, instant coverage, and exciting member benefits.

- Managed the development and delivery of responsive, cross-browser compatible webpages for multiple insurance products
- Reduced the customer bounce rate by 65% by automating bug reports and improving error-handling
- Increased the SEO, accessibility, and best practices scores of various landing pages by 40%
- Collaborated with the design team to implement consistent design systems for the design and development teams

Front-end Developer / Freelance

January 2021 - June 2021 // Ottawa, Canada

- Developed responsive web apps and landing pages from concept through deployment
- Improved the SEO, accessibility, and web performance score of the landing pages by 30%
- Worked with client stakeholders to develop technical solutions for complex business cases
- Wrote unit and integration tests to identify bugs and technical issues before and after deploying
